Millers (P) Limited

Serving the Global Plate
Expert Craftsmanship
Sustenance Nourishment

IndiaFeast Millers (P) Limited proudly stand as a paramount entity, distinguished by its eminence as a manufacturer and exporter of agricultural commodities. We are exponentially growing in the Indian subcontinent with its center of operations based in New Delhi. We are the experts in responsible sourcing of elite quality agro crops, manufacturing them and then exporting it to the international market. With a specialized focus on premium basmati and non-basmati rice varieties that are free of genetically modified organism (GMOs), we epitomize excellence in the realm of rice manufacturing and export.

Led by the stellar supervision of our Group chairman AL HAJJ MOHAMMAD SHAMEEM ANSARI our organization projects a sustainable and progressive growth. Since our establishment in 2021, we have embarked on an extraordinary journey, earning the distinguished recognition as a Govt. of India recognized STAR EXPORT HOUSE. This accolade is a testament to our unwavering dedication to upholding the highest standards of quality and sustainability. It is this commitment that has propelled us to the forefront of the agricultural industry, garnering the trust and loyalty of discerning customers worldwide.

Our diverse portfolio encompasses a captivating array of agro commodities, extending beyond the realm of rice to include premium Wheat, Pulses, Seeds, Sugar and Spices and newly introduced Foxnuts. With each product, we meticulously curate an exceptional range that embodies the finest in taste, texture, and nutritional value. By meticulously procuring one of the best farm produces, we ensure that every kernel that bears our name carries the hallmark of unrivaled quality.

At **IndiaFeast Millers (P) Limited**, we take immense pride in our efficient supply chain management system, which enables us to seamlessly procure raw materials and deliver our products worldwide in a timely manner. From field to the global palate, every step of our process is meticulously executed to ensure freshness, traceability, and adherence to international standards. With a global network of trusted partners, we have established a reputation for reliability and consistency, ensuring that our customers receive the highest level of satisfaction with each shipment.

We not only aim at our consumers' satisfaction but consumers' delight which reinforces our team to adapt rigorous quality control measures including 8 step manufacturing procedures for regular and 10 steps for parboiled rice.

At IndiaFeast, we combine traditional rice cultivation expertise with Agritech innovations to maintain the genetic purity of Indian Basmati Rice. Our commitment to excellence extends to advising farmers on scientific agricultural practices and encouraging the adoption of world-class rice processing technologies.

Through ongoing research and development initiatives, we strive to introduce cutting-edge technologies, sustainable farming practices, and innovative packaging solutions to minimize environmental impact while preserving the integrity of our products.

We are preparing to use a new carbon credit system as introduced by GOLD STANDARD with assistance from the International Rice Research Institute (IRRI) in order to decrease greenhouse gas emissions and combat climate change. We will produce carbon credits by putting sustainable practices in place that lower greenhouse gas emissions.

Our dedication to sustainable agriculture is not just a responsibility but a driving force behind our operations, ensuring the long-term well-being of our planet and the communities we serve.

Manufacturing, Processing, Packaging & Agritech

The state-of-the-art infrastructure is used in manufacturing of rice, Haryana (150 minutes drive from Delhi). It is equipped with the latest machineries for complete processing of the rice, from milling and sorting to polishing and packaging. All the machineries, elevators and plants are completely dust proof and the entire operation area is absolutely hygienic.

The processing unit is equipped with advanced machineries of brands like Satake from Japan. A perfect combination of sophisticated machinery and trained workforce provide us an innate capability to meet bulk requirements of the clients within the stipulated time frame. We offer Raw Basmati Rice, Parboiled Basmati Rice, 1121 Parboiled Basmati Rice & Broken White Basmati Rice.

Since there are five types of rice Brown Rice, White Rice, Steam Rice, Parboiled Rice and Golden Parboiled Rice the processing of rice depends upon the type of rice to be produced. The next step involves polishing of rice and it is the type of polishing that determines the quality of rice. For example, double-polish, silky polish or regular polish gives rice grains a cleaner, brighter and shiny look. However, the average grain length (AGL) is specified prior to the milling of rice and at the same time entails the broken percentage-be it 1%, 2%, 5%, 10%, 25%, 100% broken or as desired by the buyer.

While that is so in the case of brown rice, parboiled rice is obtained by means of steam pressure process prior to milling. In this case, rice is parboiled in the hull, which softens the kernel, allowing the surface starch, bran and other components to commingle. This is followed by the drainage of water and after that rice is carefully steam dried. The dried parboiled rice is passed through machines, which remove the hull and polish the kernels.

QUALITY CONTROL: We have bonded with the farmer producers organization (FPOs) who do not use any kind of harmful fertilizer or chemicals to enhance the rate of production. Our experienced team of quality control keeps constant watch over the quality and carries out rigorous quality test before supplying the products.

PACKAGING FACILITY: We excel in providing consumer packing & bulk packing of the Indian Rice ranging from 1kg to 50 kg. Some of the weight specifications are 500gm, 700gm, 1Kg, 2Kg, 5Kg, 10Kg, 20Kg, 25 Kg, 50 Kg and 1 Ton Jumbo Bags. The Rice is packed in the below mentioned packages to prevent the rice from external contaminants and damage during transportation, Fabric Bags, Laminated Pouches, Tyvek, Cartons, Poly Jars, Jute bags & Non-woven Bag.

WAREHOUSE: We have huge warehouse facility to hold massive stock of all kinds of Basmati and Non-Basmati rice. The warehouses are well-maintained and well-furnished to sustain the quality standards during the period of storage. In fact, the large stock of products has helped us to cater to the demands of the customers even in the period of crisis.
